Further advantages of our ErgoGrip safety tip knives:

- Polished, stable blade, laser-tested cutting edge
- Balanced hardness, significantly less material consumption
- Long operating life of the cutting edge – less whetting, less grinding
- Safety due to finger protection and thumb support as well as rounded back of the knives
- Knife lies comfortably in the hand
- Light, effortless and quick working
- Non-slip surface, even when wet or greasy, also with gloves
- High-grade knife alloy and consistent quality
- No gaps between the blade and handle
- Yellow handle colour for easy visual detection
